

Node.js Contributor Workshop

@CCOSS - 2019

- 10:00 - Introduction to Projects
- 10:30 - Project Landscape
- 11:30 - Break 🎉
- 12:30 - Environment Setup
- 13:00 - Lunch
- 14:30 - Contribution Hackathon
- 18:00 - Party 🎉

Code Contributions

Becoming a collaborator

The ~~Node.js~~ OpenJS Foundation

The OpenJS Foundation is governed by a board consisting of corporate members, an Individual Membership Director, a TSC Director, and a CommComm Director. In total, 5 committees within the Foundation – the TSC, the CommComm, the Legal Committee, the Marketing Committee and the Finance Committee.

TSC

The Node.js Technical Steering Committee, a top-level committee in the OpenJS Foundation tasked with technical stewardship of the project as a whole.

CommComm

The Node.js Community Committee, a top-level committee in the OpenJS Foundation tasked with outward facing work and community relations.

WG

Working Group, a group with independent governance and ownership of a specific task or domain.

Initiative and Team

These are groups that aren't independently chartered but have some form of ownership over a task or domain. **Initiative** is used in the CommComm and TSC, while **Team** is only used by the TSC.

Working Groups are a concept under the TSC but not the Community Committee. They have formal, independent charters just like the TSC and CommComm. Initiatives and Teams are concepts in both the TSC and CommComm, and are almost identical to Working Groups in practice, with the critical difference of not being independently chartered.

**Contribute to WS, Initiatives
and Teams**

Package Maintenance

i18n - Internationalization

Automation Team

CITGM

Benchmarking WG

Release Team

Community Committee

**Upcoming: Website Redesign
and i18n**

Core

Effectively the `nodejs/node` repo.

Governance

Node.js leans very heavily on open governance. The project itself has a [GOVERNANCE.md](#) that dictates how the project is governed, but there are additional [GOVERNANCE.md](#) files throughout the GitHub organization for different groups – like the CommComm – which have independent governance.

Contribute with Content

Documentation

Guides

Node.js Collection

Contributing Through Automation

It's also worth noting that Node.js follows a global **Code of Conduct**, so if you are interested in participating be sure to give it a read.

Environment Setup

Check per project dependencies

Contributor Hackathon

Let's go!

Thanks for joining 🎉

Hope to see you again 🙌
